

SRISHTI SEHGAL

B.Tech CSE(2023–2027)|CSE Student

srishtisehgal2801@gmail.com | +91-9057479018 | linkedin.com/in/srishti-sehgal-73726a320 | github.com/Srishti620

SUMMARY

B.Tech Computer Science Engineering student with a passion for building things that work and look good. I enjoy turning ideas into real, usable applications and am always looking to learn from experienced engineers in a professional environment. Currently seeking opportunities where I can contribute meaningfully, grow fast, and take on responsibilities and hands-on experience.

TECHNICALSKILLS

Languages: C, C++, JavaScript (ES6+), Python, Java, HTML5, CSS3.

Frameworks & Libraries: React.js, Node.js, Express.js, Flask, REST APIs.

Databases: MySQL, MongoDB

Tools & Platforms : Git, GitHub/GitLab, VSCode, Postman, Vercel/Netlify

PROJECTS

TaskNova — Academic Task Management System | *Tech: React, Node.js, Express, MySQL, MongoDB*

[GitHub:github.com/Srishti620/tasknova](https://github.com/Srishti620/tasknova) | [LiveDemo:tasknova-zeta.vercel.app](https://tasknova-zeta.vercel.app)

- Built a full-stack task organizer for students with a dynamic Kanban-style dashboard (To-Do/In Progress / Completed), handling 3 task states and real-time UI updates using React hooks.
- Implemented JWT-based user authentication (Login/Signup) with encrypted passwords, securing access for 50+ test users during internal college testing.
- Designed a priority-scoring algorithm in Node.js that ranked tasks by urgency, importance, and learning impact — reducing average task decision time by an estimated 35%.
- Integrated reminders and a progress tracker, enabling students to track completion rate across subjects; early testers reported a 2x improvement in assignment completion.
- Deployed backend on Render and frontend on Vercel with CI/CD via GitHub Actions.

Smart Meal Planner —Personalized Diet Planning System | *Tech: HTML, CSS, JavaScript, Python(Flask), MongoDB,, MySQL*

[GitHub:github.com/Srishti620/smart-meal-planner](https://github.com/Srishti620/smart-meal-planner) | [LiveDemo:ai-based-smart-meal-planner.netlify.app](https://ai-based-smart-meal-planner.netlify.app)

- Built a rule-based recommendation engine in Python (Flask) that generates personalized daily meal plans based on user inputs: age, weight, health goals, and dietary preferences.
- Designed a calorie-calculation module using standard BMR/TDEE formulas (Harris-Benedict), mapping daily caloric needs to a curated database of 100+ food items stored in MySQL.
- Implemented a RESTful API with 6 endpoints connecting the Flask backend to a JavaScript frontend, achieving average API response time under 300ms in local testing.
- Structured dual-database storage: MySQL for structured food/user data and MongoDB for session and preference logs.

Student Management System | *Tech: HTML, CSS, MySQL*

[GitHub:github.com/Srishti620](https://github.com/Srishti620)

- Developed a web-based CRUD application to manage student records for 200+ entries, with add/edit/delete/search functionality built using plain JavaScript and MySQL.
- Designed a normalized 3-table relational schema (students, courses, enrollments), reducing data redundancy and improving query efficiency.

EDUCATION

B.Tech in Computer Science & Engineering—Modern Institute of Technology & Research Centre, Alwar
2023–2027(*Expected*)|*Bikaner Technical University*

Senior Secondary(XII)—RajasthanBoardofSecondaryEducation, 2023

CERTIFICATIONS&TRAINING

Full Stack Web Development—College Program—MITRC

- Completed end-to-end web application development covering HTML/CSS, JavaScript, backend connectivity, and database integration.

Cloud & DevOps Fundamentals—College Program—MITRC

- Gained hands-on experience with Git/GitHub version control, CI/CD pipelines, and foundational cloud deployment concepts.

Advanced Java Programming—College Program—MITRC

- Covered OOP principles, core Java fundamentals, and applied problem-solving through 10+ practical coding exercises.

STRENGTHS

- Strong analytical and problem-solving mindset •Fast learner who adapts quickly to new techstacks
- Effective communicator and collaborative team player •Detail-oriented with a focus on clean, readable code.
