SUMMARY

Software Engineer with a strong foundation in building full-stack web applications, from frontend to backend to database, and a genuine interest in writing clean, maintainable code. Comfortable across the development lifecycle and quick to pick up new tools and technologies. Passionate about solving real-world problems through functional, reliable applications. Looking for a Software Engineer or Full Stack Developer role where I can keep learning, take ownership of my work, and grow as part of a strong team.

EXPERIENCE

Junior Software Developer | EcoPlug Energy India Limited 1 September 2026 – Present

- Working on the design and maintenance of the OCPI panel on the company website, ecoplug.in.
- Understanding the existing codebase and development workflow, and contributing to maintaining and improving the application.

Software Engineer Intern | Success Ladder Technologies Pvt. Ltd

- Full-stack contributor to a Website Audit Tool covering SEO, accessibility, performance, and security; built reusable React.js components and Node.js/Express.js REST endpoints to trigger audits and serve reports.
- Integrated Google Lighthouse for Performance, Accessibility, Best Practices, and SEO scores and Core Web Vitals (FCP, LCP, CLS).
- Used Puppeteer for automated crawling and responsiveness testing, and server-side HTML parsing for meta tags, headings, Open Graph, and schema markup.
- Implemented broken-link and meta validation, designed MongoDB schemas for audit history and reports, and worked in an Agile workflow using Git/GitHub.

PROJECTS

OCPI Panel – ecoplug.in | EcoPlug Energy India Limited (Current Project)

- Working on the design and ongoing maintenance of the OCPI panel on the company's website, ecoplug.in, as part of the development team.
- Studying the existing application end to end: code flow, overall architecture, and how the existing modules fit together.
- Learning the team's development and maintenance workflow, and contributing to keeping the application stable and improving it.

Website Audit Tool | Industry Project

Tech Stack: React.js, Node.js, Express.js, MongoDB, Lighthouse, Puppeteer, Cheerio, REST APIs

- Full-stack auditing platform combining SEO, accessibility, performance, and security analysis in one dashboard, with each analysis built as an independent REST service.
- Contributed to the architecture, an AI Visibility Score module, schema/Open Graph/meta validation, broken-link detection, mobile responsiveness testing, report generation, and dashboard views.

Book Buddy | AI-Powered Reading & Study Companion

Tech Stack: React.js, Node.js, Express.js, MongoDB, LLM API (OpenAI/Gemini)

- MERN app that turns uploaded books into chapter-wise summaries and auto-generated MCQs for self-practice.
- Built the document-processing pipeline (chapter detection), LLM integration, Express REST APIs, React UI, and MongoDB storage.

TaskNova | Academic Task Management Platform

Tech Stack: React.js, Node.js, Express.js, MongoDB, MySQL

- Kanban-style task platform for students with JWT authentication, a deadline/importance-based priority scoring system, and reminders.
- Designed REST APIs, split data across MongoDB and MySQL, and deployed the app end-to-end.

Smart Meal Planner | Personalized Nutrition & Diet Planning

Tech Stack: Flask, Python, JavaScript, MongoDB, MySQL

- Generates personalized diet plans by calculating BMR and TDEE in Python and mapping calorie targets to meal suggestions.
- Built Flask REST APIs and a JavaScript frontend; used MongoDB for meal data and MySQL for user profiles.

Student Management System | CRUD-Based Records Application

Tech Stack: HTML, CSS, JavaScript, MySQL

- CRUD web app for student records with search and client-side validation, backed by a normalized MySQL schema and SQL queries.

TECHNICAL SKILLS

Languages: JavaScript, Python, Java, HTML5, CSS3

Frontend: React.js, Responsive Design, Component-Based Architecture

Backend: Node.js, Express.js, REST API Development, JWT Authentication

Databases: MongoDB, MySQL, Schema Design & Normalization

Web Auditing & Automation: Lighthouse, Puppeteer, Cheerio, SEO Analysis, Accessibility Testing, Core Web Vitals

Tools & Platforms: Git, GitHub, Postman, VS Code, Vercel, Netlify, Render

Practices: Agile/Scrum, Debugging, Software Testing, SDLC

EDUCATION

B.Tech in Computer Science & Engineering | MITRC Alwar, Bikaner Technical University 2023 – 2027

Senior Secondary (Class 12) | RBSE (Rajasthan Board) 2023

Secondary (Class 10) | RBSE (Rajasthan Board) 2021

CERTIFICATIONS & TRAININGS

- **Full Stack Web Development Training** – frontend, backend, database integration, REST API design, authentication, and deployment.
- **Cloud & DevOps Fundamentals** – Git/GitHub workflows, CI/CD concepts, and cloud deployment basics.
- **Advanced Java Programming** – OOP, collections, and exception handling.
